Introduction

The GAFSP Trust Fund ("Trust Fund") was established as a Financial Intermediary Fund (FIF) in April 2010 in the World Bank. The GAFSP is a multilateral mechanism to assist in the implementation of pledges made by the G20 in Pittsburgh in September 2009. The objective is to address the underfunding of country and regional agriculture and food security strategic investment plans already being developed by countries in consultation with contributors and other stakeholders at the country-level. The GAFSP operates through two windows: Public Sector Window and Private Sector Window. The Public Sector Window is managed under the Trust Fund while the Private Sector Window is managed by the IFC. This report covers only the Public Sector Window.

The report is produced by the Trustee in accordance with the Trustee's role in the GAFSP Governance Document as set forth under Section 5, which states:

"The Trustee will provide to the Steering Committee regular reports on the financial status of the Trust Fund, as set forth in the Contribution Agreements."

Section 9 of the Standard Provisions in the Contribution Agreements for the Public Sector Window states as follows: "The Trustee shall maintain separate records and ledger accounts in respect of the Trust Fund funds deposited in the Trust Fund and disbursements made therefrom. The Trustee shall report to the Steering Committee annually unless otherwise agreed between the Trustee and the Steering Committee, on the status of Allocations of funding recorded by the Trustee, commitments and transfers from the Trust Fund and receipts of funds in the Trust Fund."

This report covers the financial status of the GAFSP Trust Fund as of June 30, 2021.

GAFSP Trust Fund Financial Summary as of June 30, 2021

Pledges and Contributions:

A pledge represents a contributor's expression of intent to make a contribution. Contributors finalize their pledges by way of a countersigned Contribution Agreement/Arrangement.

As of June 30, 2021, contributions and pledges to the Public Sector Window of the Trust Fund totaled USDeq. 1,740.8 million. Of this amount, USD 1,581.3 million has been received by the Trustee in cash.

3. Asset Mix and Investment Income

ASSET MIX

Cash assets held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the "Pool") for all trust funds administered by the World Bank. The assets in the Pool are managed in accordance with the investment strategy established for all trust funds administered by the World Bank.

The Trust Fund balance is currently invested across three of the Pool's investment model portfolios ("Model Portfolio 0" (MP0) with an investment horizon of up to three months, "Model Portfolio 1" (MP1) with an investment horizon of one year, and "Model Portfolio 2" (MP2) with an investment horizon of three years). While MP0 has the objective of ensuring timely availability of funds to meet the short-term cash flow needs, MP1 and MP2 aim to enhance returns subject to capital preservation with a high degree of confidence (based on statistical models) over the respective investment horizons. Preservation of capital is the primary investment objective. Consequently, the Trust Funds investment portfolios are managed to conservative overall risk tolerance parameters.²

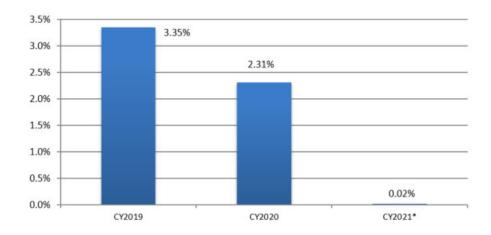

The Trust Fund assets are invested in high grade fixed income and money market instruments. Currently, these instruments include high quality securities that are issued by sovereign governments, government agencies, as well as multilateral and other official institutions. In addition, eligible instruments include asset-backed and agency-guaranteed mortgage-backed securities, as well as swaps and a range of other derivative instruments related to investments and which are used to manage the interest rate risk. Figure 1 below presents the portfolio allocation by asset class as of June 30, 2021.

² Generating enhanced investment returns while adhering to the investment objective of capital preservation and ensuring sufficient liquidity to meet foreseeable cash flow needs is undertaken within a conservative risk management framework which limits the estimated average loss to the portfolio in the worst 1% of loss events. The Conditional Value-at-Risk (CVaR) measure is the primary risk constraint used in the management of trust fund model portfolios. MP1 and MP2 have 99% CVaR measures of no greater than -0.25% and -1.00%, respectively.

INVESTMENT RETURNS

The Trust Fund liquid portfolio (which totaled approximately USD 501.8 million at end-June 2021) earned approximately USD 62.3 million³ in investment income since inception. The portfolio returns during the first two quarters of calendar year 2021 was about 0.02%, non-annualized.
