Dear GAFSP Coordination Unit,

For your request, below is an indicative note of the Agriculture and Food Security Development Strategy.

I send to you some specific sector strategies by « wetransfer ». Kindly acknowledge receipt of the documents

Note on Agricultural and Food Security development strategy

The agricultural and food security development in Côte d'Ivoire is organized as follows:

At the first level: the Agricultural Orientation Law that was adopted in 2015, and represents the framework for the application of agricultural development policies and strategies. It enables the harmonization and the adjustment/enrichment of the shortcomings of the existing specific laws in the agricultural sector.

At the second level: the National Agricultural Investment Programme (NAIP) Adopted in 2017. The NAIP provides a coherent framework for the programming of public and private investments in the agricultural and food security sector and aims at stimulating sectoral growth to reduce poverty and achieve "zero hunger" by 2025.

✓ Finally, this investment programme is operationalized through specific strategies for the development of agricultural sub-sectors, cross-cutting approaches to agricultural development challenges. The most important of these sub-sector development strategies are:

- For the oil palm sector, the 3rd Palm plan;
- For Hevea sector, the 7th Hevea project,
- For cocoa and coffee, the Quantity, Quality and Growth (2QC) plan,
- For food crops, National Food Crop Development Strategy other than rice;
- For the rice sector, National Strategy for the development of the rice sector,
- For agricultural tracks, National Rural Roads Strategy
- For rural land, the Rural Land Policy;

- For irrigation, Irrigation Strategic Plan;
- For the animal and fisheries sectors, Strategy for the Development of Livestock, Fisheries and Aquaculture;
- For resilience, a "Country Resilience Priority" program;
- For climate change, a Climate Intelligence Agriculture Investment Plan in Côte d'Ivoire.

Other specific cross-cutting strategies such as the national agricultural training strategy, the national agricultural international cooperation strategy, the agricultural communication strategy, the strategy for the development of the cashew industry in Côte d'Ivoire currently being formulated will complement the above-mentioned.

In sum, the Agricultural Orientation Law is the fundamental basis of the agricultural development and food security policy in Côte d'Ivoire, from which PNIA and other specific strategies derive from.

Dear Mr Comoe

Thank you again for sending Cote d'Ivoire's submission to GAFSP. We have reviewed the submission package and wanted to revert to you for clarification on one document, the country's Agriculture and Food Security Strategy document (#6 on the GAFSP submission Document Checklist).

The CU notes that the submitted strategy document appears more to be an Agricultural Law document. Could we confirm that this is submitted as your Agriculture Strategy document?

If you would wish to provide any alternate or complementary documentation in fulfilment of the required Agriculture and Food Security Strategy, please do so by Monday 16th September, 2019. This is the extended deadline for additional documents and we will not be able to accept any documents sent after this deadline.

Best regards,
GAFSP Coordination Unit

Subject: RE: GAFSP Côte d'Ivoire Submission- Batch 1/3

Dear Mr Comoe

Thank you for sending the government of Cote d'Ivoire's submission to the Global Agriculture and Food Security Program 2019 Call for Proposals. I am writing on behalf of the GAFSP Coordination Unit (CU) to acknowledge receipt of the submitted application.

I note that the submission has been sent in three separate email transmissions and confirm receipt of all three messages, plus one final (fourth) communication via 'wetransfer'.

The application package will shortly be reviewed by the CU for completeness and eligibility and we will revert if any additional information is required. If everything is in order, you would be notified and the application package will then be forwarded to the Technical Advisory Committee for their review.

Best regards,
GAFSP Coordination Unit
