**ZAMBIA COMPREHENSIVE AFRICA AGRICULTURE
DEVELOPMENT PROGRAMME COMPACT
TO SUPPORT
THE SUCCESSFUL IMPLEMENTATION OF THE NATIONAL AGRICULTURAL
POLICY AND THE VISION 2030
THROUGH NATIONAL DEVELOPMENT PLANS**

A. Background to the Comprehensive Africa Agriculture Development Programme (CAADP) in the Republic of Zambia

1. CAADP as an African Owned Agenda and a Shared Development Framework

The Comprehensive Africa Agriculture Development Programme (CAADP) is an initiative by African governments under the African Union/New Partnership for Africa's Development (AU/NEPAD) to accelerate growth and eliminate poverty and hunger among African countries. The main goal of CAADP is to help African countries reach a higher path of economic growth and achieve Millennium Development Goals (MDGs) through agriculturally-led development which eliminates hunger, reduces poverty and food and nutrition insecurity, and enables expansion of agricultural exports. An agricultural sector growth of 6% was envisaged to bring about this change, which was anticipated to be triggered by at least a 10% annual national budgetary allocation (GRZ and donor) to the sector. As a framework of the AU, it emanates from and is fully owned and led by African governments. The Common Market for Eastern and Southern Africa (COMESA) has been mandated to coordinate and harmonize CAADP implementation in its region as a partner with national authorities, Cooperating Partners (CPs), the private sector, Civil Society Organizations (CSOs) and the Southern African Development Community (SADC) as a part of the NEPAD initiative, fully reflecting the broader principles of mutual review and dialogue, accountability, and partnership.

The Zambia CAADP Compact (ZCC) is intended to strengthen, support and facilitate effective implementation of the National Agriculture Policy (NAP) and the Vision 2030 through five-year phases of National Development Plans (NDPs) and ensuring that vulnerable populations have the opportunity to both contribute to, and benefit from such agricultural growth. The NDPs provide a framework that ensures consistency and continuity in the realization of the NAP, MDGs and Vision 2030 aspirations. In this regard, the ZCC will support and strengthen the implementation of the Sixth National Development Plan (SNDP) which runs from 2011 to 2015. The agriculture chapter of the Sixth National Development Plan (SNDP) will be consistent with investment programmes under the ZCC, meeting the MDGs and in particular, the MDG goal of reducing extreme poverty and hunger by half by 2015.

2. CAADP as a Value Addition Agenda at the Country Level

Although continental in scope, the CAADP agenda is an integral part of national efforts to reduce poverty and hunger through agricultural sector growth and economic development. It provides a shared framework for strategy planning and implementation, and for partnership and development assistance in the agricultural sector. This is based upon the recommendation of Africa's professional communities of practice and broad dialogue with stakeholders across the continent. Further, it offers the prospect of political, technical and financial support for countries with plans and strategies that are aligned with the CAADP framework. In aligning with CAADP guidelines and principles, countries adopt common commitment to achieve an annual growth rate of 6 percent in agriculture, allocating at least 10 percent of national budgets to the sector (as guided by the Maputo Declaration adopted in 2003 by African Heads of State), and will take account of the support of assistance from commitments of the recent G8 Summits.

More specifically, value addition of the CAADP Compact in Zambia is envisaged in the following ways:

- (i) Helping define a coherent long term framework to guide the planning and implementation of current and future policies, NDPs, and other development initiatives;
- (ii) Providing a framework for increased private sector investment;
- (iii) Identifying strategic options and strategies for poverty reducing growth including diversification of the agricultural sector ;
- (iv) Ensuring that vulnerable populations have the opportunity to both contribute to, and benefit from agricultural growth, reducing their vulnerability to economic and climatic shocks, recognizing the threat that poverty, chronic hunger, and malnutrition pose to the current and future productivity of the country;
- (v) Developing agricultural production systems that ensure the sustainable use of Zambia's natural resources, including forests and water resources;
- (vi) Developing existing and new strategic analysis and knowledge support systems to facilitate peer review, dialogue, evidence-based planning and implementation of agricultural sector policies and strategies;
- (vii) Providing the budgetary guidelines that sets the minimum 10% target in the annual national budgetary allocation which will guarantee continuity in government resource allocation for the country's agricultural development agenda;
- (viii) Providing the basis for the periodic impact evaluation of the performance of the agricultural sector by setting the two targets of 6% annual growth rate of the agricultural sector and 10% budgetary allocation. This will also facilitate a comparative analysis of Zambia's performance with that of other African countries, thereby providing a motivation for improved performance;
- (ix) Compliance to CAADP entails giving the necessary attention to the critical factors articulated through the four pillars: land and water management; market access; food, nutrition security and safety; and agricultural research and technology. These factors are vital for sustained agricultural production, productivity and growth; and
- (x) It is intended that the national CAADP compact will provide a basis for developing bankable investment projects and input into the formulation of a supporting regional compact.

B. Rationale for the Zambia CAADP Compact

Given the Government's long-term vision to make Zambia a medium income nation with agriculture as the engine for economic and social development, there are serious challenges that need to be addressed if this vision is to be realized. These among others include: (i) low investment (especially in critical programmes that would stimulate growth) in the agricultural sector by government and the private sector despite the sector's support to the livelihood of over 60% of the population; (ii) low production and productivity especially among smallholder farmers due to low input use and low levels of technology; and, iii) Chronic hunger and malnutrition that threatens Zambia's long term development and its 2030 vision.

In view of the foregoing challenges, the Compact (i) sets the parameters for long term partnership in the agricultural sector and specifies key commitments on the part of government and development partners which should lead to improved resource investment, production, productivity levels and in tackling poverty, hunger and malnutrition. This should address the above three challenges; and (ii) clarifies expectations with respect to the private sector, the Civil Society Organizations, farming communities, the most vulnerable and the importance of markets in stimulating production and productivity, in order to ensure successful implementation of the NDPs and the Vision 2030.

Further, this Compact serves to verify and confirm the general consensus around the goals and priorities that Zambia has set for the agricultural sector and the partnerships and assistance that are required to achieve these goals. Its ultimate purpose is to: (i) increase the effectiveness in planning and execution of efforts of government, private sector and other players, as well as of the delivery of services in the agricultural sector and thereby (ii) provide a solid framework under which assistance can be scaled up to help meet the short and long term investment needs to secure a sustained growth of the economy through the agricultural sector.

C. Long Term Vision and Commitment of the Government of Zambia to economic development and poverty reduction

The Government of Zambia defined its long term economic development agenda in the Vision 2030 which states that Zambia shall become "A Prosperous Middle Income Nation by 2030. The Vision 2030 sets out government's commitment of embarking on an economic development path that will lead to significant poverty reduction resulting in Zambia becoming a middle income country by the year 2030. Given that the majority of the country's population depends on the agricultural sector for their livelihood, Government has identified the agricultural sector as key in leading the country's overall economic development. This will be through the design and implementation of medium term 5 year NDPs which will focus on the implementation of the priority policies and programmes that will facilitate appropriate investment profiles (see Appendix 1 for details). The policies and programmes in Appendix 1 are aligned to the following CAADP four pillars.

Pillar I (Sustainable land and water management):

- (xi) Government will develop and implement policies and programmes that support increased agricultural productivity, sustainable land and water management including forestry, agro-forestry, livestock and fisheries development, climate change adaptation and mitigation;
- (xii) Government will facilitate equitable access to land.

Pillar II (Rural infrastructure and markets):

- (xiii) Government and the private sector will implement and adhere to predictable, rule-based market and trade policies and strengthen public-private coordination and dialogue;
- (xiv) Government in consultation with other stakeholders will identify investment priorities in infrastructure development that support the agriculture sector including livestock and fisheries;
- (xv) Government will facilitate private sector scaling up investments in production, input and output markets.

Pillar III (Food supply and hunger):

- (xvi) Government will promote diversified extension messages to cater for all categories of farmers including resource poor households;
- (xvii) Government will explore social protection instruments in partnership with private sector and civil society; and

Pillar IV (Agriculture research and technology dissemination):

- (xviii) Government will commit itself to providing adequate resources in order to develop cost

effective, demand-driven research and extension linkages focusing on public-private partnerships.

D. The Government's agenda for Agricultural Growth, Poverty Reduction, and Food and Nutrition Security

Government's agenda for ensuring agricultural growth, poverty reduction and food security is guided by the following agricultural development policies and strategies: i) the National Agricultural Policy (NAP); ii) the Vision 2030, and the National Development Plans; iii) various specific policies and strategies to guide development in the sector; and, iv) CAADP principles embraced by the government. The overall objective of the agricultural sector is to facilitate and support the development of a sustainable and competitive agricultural sector that assures food security at national and household levels and maximizes the sector's contribution to GDP.

In the last 10 years, Zambia has implemented various policies and programmes aimed at increasing agricultural growth. However, there has been limited sector growth and reduction in poverty and food insecurity. The Stock Taking Report and the Agricultural Growth and Investment Options Report of 2007 observed that it was possible for Zambia to achieve the CAADP annual agriculture growth rate target of 6% provided that government spending to the sector was increased to at least 16% of annual national budget. Based on the review and stocktaking exercise, Zambia through a general consensus process, has identified the programmes summarized in Table 1 below. There are four important cross-cutting interventions that will be implemented alongside the programmes summarized in Table 1. These are: (i) Training (capacity building); (ii) Monitoring and Evaluation; (iii) Gender; and (iv) HIV/AIDS. Environment will be dealt with as part of the mainstream programmes. These programmes are all compliant to CAADP through its four pillars as demonstrated in Table 1 below. Both the pillars and programmes are interlinked and cut across the various sub-sectors under the two ministries in the agricultural sector. The programmes highlighted in the Table below will form part of GRZ's key strategies in the realization of its long term policies and goals implemented through NDPs and consequently are consistent with the agriculture chapter of the Sixth National Development Plan (SNDP).

Table 1: Compliance of the Zambia Compact to CAADP Pillars

CAADP Pillar	CAADP Compact Programmes
Pillar I: Extending the area under sustainable land management and reliable water control systems;	1 Sustainable land management programme 2 Agricultural productivity improvement programme
Pillar II: Improving rural infrastructure and trade-related capacities for market access;	3 Agricultural marketing development programme 4 Agricultural investment promotion programme
Pillar III: Increasing food supply, reducing hunger and improving responses to food emergency crises	5 Food and nutrition security programme
Pillar IV: Improving agriculture research, technology dissemination and adoption	6 Research and extension enhancement programme

Detailed investment programmes and budgets for the CAADP Compact will be prepared in consultation with stakeholders and will be in conformity with the Agricultural Chapter of the Sixth National Development Plan.

Government has agreed and committed itself to reforming the Farmer Input Support Programme in

enhanced input technology adoption. Under the reformed Programme, the private sector will play a leading role, while government will provide a conducive policy environment and appropriate incentives to boost private sector investments and engagement in the input market.

In order for agricultural marketing and agribusiness to thrive, existing government policies and programmes will need to be fully implemented. The National Agricultural Policy, the Agricultural Credit Act and the Agricultural Marketing Bill are examples of policies and legislation that will be enacted, and when implemented, will create a conducive investment and business climate that will address many of the existing marketing constraints that are currently impediments to the agricultural sector's development. See **Appendix 1** for details of policy statements and investment profiles.

E. Forging Partnerships for the Successful Implementation of the Investment Priorities

1. Purpose, Principles, and Modalities of the CAADP Partnerships

This compact will support partnerships between the government of Zambia, the agribusiness and farming communities, input suppliers, traders, financial institutions, the Civil Society Organizations and the development partners in the successful implementation of the country's long term investment priorities including the Vision 2030. Further, the role of COMESA and other regional partners supporting the CAADP agenda in the implementation of programmes is well recognized under this compact in Zambia.

2. Government Commitment to Poverty reduction and Economic Development

The government of Zambia confirms its commitment to promoting long term economic and social development to achieve a strong and dynamic middle-income nation that provides opportunities for improving the well being of all, and to achieve "poverty reduction and economic growth" as identified in its Vision 2030 document and set out in its NDPs. It confirms the revised NAP as its framework to achieve the goals and aspirations related to the above vision. It recognizes the need to strengthen and expand the emerging opportunities and to deal with the challenges facing the agricultural sector. In addition, the Government commits itself to bringing on board all players in the agricultural sector, including the private sector and civil society, in the implementation of the CAADP Programme; and clearly spells out their roles, responsibilities and linkages. The Government further commits itself to harmonization of external financing and technical assistance through the Poverty Reduction Budget Support (PRBS), the Performance Assessment Framework (PAF) and other modalities noted in the National Aid Policy.

Furthermore, the Government commits to ensuring that vulnerable populations have the opportunity to contribute and benefit from agricultural growth—a focus that operationalizes CAADP's commitment to broad-based agricultural growth as the best way of achieving sustainable food security in Africa; it also recognizes the need to reduce the vulnerability of poor households to economic and climatic shocks, and the enormous threat posed by chronic hunger and malnutrition to the current and future productivity in Zambia.

Government will ensure efficiency and effectiveness in pursuing the implementation of the Vision 2030 and the NAP through the facilitation of the CAADP Compact as its strategy to achieve and exceed the 6% CAADP growth target over the coming years. In the NDPs, focus will be to improve the quality of expenditures in the sector, aimed at boosting production and productivity. Government commits itself to fulfilling the Maputo Declaration of the heads of state and government of the African Union of allocating and spending at least 10% of the national budget to the agricultural sector. This will contribute towards meeting the investments required to realize the outcomes in the Vision 2030 and NAP using NDPs. In this regard, GRZ will ensure maximum efficiency and effective utilization of resources in the

sector as demonstrated in the Performance Assessment Framework (PAF), Joint Sector Review and Public Expenditure Reviews, in line with its broader efforts to strengthen public financial management. It commits itself to dialogue, coordination, mutual review, and accountability mechanisms and modalities specified in its aid policy. Details of policies and investment portfolios to which Government commits itself are at Appendix 1.

3. Cooperating Partners' Commitments Under the Vision 2030 and the CAADP Agenda

The Cooperating Partners confirm their commitment to the Aid Policy and Joint Assistance Strategy for Zambia (JASZ) that achieving the MDGs and meeting Zambia's Vision 2030 requires increases in the volume and quality of development assistance. Therefore, they commit, collectively, to align assistance to the sector with the programmes and priorities identified in the Vision 2030 and NAP agenda, operationalized through NDPs and to scale up assistance over the next 5 years, subject to the availability of funds, to help meet investment costs of the programmes defined under the agenda.

The Cooperating Partners are committed to support Zambia in its endeavors to define priority programmes that would allow the country to meet the objectives of CAADP and be on the road to attaining MDG1. In this regard the Cooperating Partners will support Zambia's CAADP Compact as defined in the NDPs as strategies towards the achievement of the NAP and Vision 2030 aspirations through mobilizing of financial and technical support. In the spirit of the National Aid Policy, the CPs will commit, in consultation with the government, to provide indications of future aid, when possible, to the sector in order to improve implementation of agricultural programmes. They commit to provide such aid and related technical assistance in line with principles set out in the National Aid Policy, including the principles and mechanisms for dialogue, coordination, mutual reviews and accountability

4. African Union and Regional Partners' Commitments under the Maputo Declaration

The African Union through NEPAD, SADC, COMESA and its regional partners are committed through the Maputo Declaration, to support Zambia in its endeavors to define priority programmes that would allow the country to meet the objectives of CAADP and be on the road to attaining MDG1. In this regard, the African Union, COMESA and other regional partners will support Zambia's CAADP Compact as defined in the NDPs as strategies towards the achievement of the NAP and Vision 2030 aspirations through mobilizing of financial and technical support.

5. Commitments of the Private Sector and Civil Society

The private sector including: producers, processors, traders, input suppliers, financial institutions and the civil society commit themselves to effectively partnering with the government and the people of Zambia in establishing enterprises and initiatives that will have measurable impact in reducing poverty levels in the country and increasing economic growth. These actors will ensure increased participation of their constituents and accountability of the CAADP implementation process.

F. Implementation of the Vision 2030, NAP and NDPs through the CAADP Compact

1. Coordination, oversight and implementation

Government, working closely with the Agricultural Sector Advisory Group (AgSAG), will provide the overall coordination and oversight of CAADP implementation. The AgSAG, which comprises all key stakeholders in the agricultural sector, will also monitor the CAADP implementation. Capacity building in the sector will be required in order to ensure effectiveness and efficiency in service delivery. In addition

to MACO, MLFD and the private sector, other government ministries and organizations will be involved in the realization of the CAADP outputs, e.g. rural feeder roads; rural electrification; and climate change.

In line with the liberalization policy, the private sector will drive the development of the agricultural sector along with the civil society and farmer organizations (including small scale, medium and large scale farmers) as partners. Government and these partners, will be engaged in the following aspects of the ZCC implementation: (i) monitoring and evaluation; (ii) advocacy on behalf of their constituency; (iii) capacity building of farmer organizations and individuals; (iv) promotion of sustainable agricultural practices; (v) farmer training and extension service provision; (vi) storage; (vii) inputs; (viii) outputs; (ix) exports; (x) finance; (xi) value addition; and (xii) actual implementation and management of programme components.

Research institutions, including public universities, will play a vital role in research and human capacity development in order to strengthen linkages between industry and academia/public universities. Achievement of CAADP Compact goals will require tapping into and expanding the human resource capacity available through research institutions in Zambia.

Government will also focus on regulatory and facilitatory functions including improvement of the macro-economic policy environment that stimulate the growth of the agricultural export sector as well as enhancing private sector participation and resource mobilization. In this regard, Government facilitatory functions will include: strategic planning; oversight; policy formulation; enforcement of legislation; regulation and inspection; provision of basic agricultural and rural infrastructure; financing of the control of pests and diseases of national economic importance; sector coordination and overall monitoring and evaluation. The Ministries of Agriculture and Co-operatives and Livestock and Fisheries Development will take the lead in ensuring effective coordination of the sector.

Government recognizes that making significant progress particularly through Pillar III will contribute directly to the overall CAADP objective of achieving a growth rate sufficient to meet the MDGs, particularly the goal of reducing poverty and hunger by half by 2015. Progress will be measured through improvement in food security and nutrition indicators and improvement in the household asset and/or income levels of targeted vulnerable populations.

2. Funding mobilization

Government and Cooperating Partners will mobilize funding from both domestic and external sources using the existing financing architecture to continue implementation of the Vision 2030, NAP, and the NDPs components that are ready or ongoing and need scaling up. For this purpose, Government and other partners will hold regular consultations through appropriate channels. Government and other partners will fulfill their commitments once detailed and prioritized investment programmes and budgets have been developed. In case of CPs, the funding commitments will include on-going programmes where funding has already been committed.

The funding to the agricultural sector will reflect its priority areas of investment. The financial resources by the private sector may come from financing institutions including out-grower schemes. Currently a number of financing institutions are already funding the sector and are determined to scale up the funding portfolio.

G. Endorsement

By endorsing this Compact:

- 1) The Government of Zambia pledges to fulfill the commitments specified therein, in line with the goals, objectives, principles, and modalities laid out in its Vision 2030 document, NAP, NDPs, and National Aid Policy;
- 2) The development partners pledge, collectively, and based on availability of funds, to fulfill the commitments specified therein in line with the Joint Assessment Strategy statement of April 2007.
- 3) The African Union, SADC, COMESA and other regional partners pledge, collectively, to fulfill commitments specified therein in line with the Maputo Declaration and global principles of CAADP implementation.
- 4) The private sector, producer associations and civil society pledge collectively, to fulfill commitments specified therein in line with the Maputo Declaration and global principles of CAADP Implementation.
